

INTERNATIONAL
INSTITUTE for
RESTORATIVE
REPRODUCTIVE
MEDICINE

Presents:

Restorative Reproductive Medicine Conference

&

Scientific Forum

March 31st, 2012

Banff, Alberta, Canada.

The Mission of the International IRRM is to advance excellence in Restorative Reproductive Medicine by supporting practice and research through mentorship, education and collaboration.

Restorative Reproductive Medicine encompasses medical approaches which aim to identify and address underlying reproductive disorders and correct or optimize function. Health care providers who practice Restorative Reproductive Medicine employ a variety of approaches but use only methods that are not inherently destructive, circumventive or suppressive and they adhere strictly to these philosophical principles.

A growing network of professionals

The International IRRM is the leading voice in uniting providers who share a common belief that patients deserve evidence-based reproductive health care services that cooperate with and restore reproductive function. With the successful roll out of our international conferences and webinar agenda we now can actively reach and support providers in all four corners of the globe. With our educational series and active support of research in the field we are able to provide our members with unparalleled opportunities to be part of transforming reproductive medicine.

Join us and share your experience while learning about the latest advances in the field of Restorative Reproductive Medicine. Help take an active role in shaping a future in which Restorative Reproductive Medicine, backed by published evidence and years of experience, becomes the standard of care.
